

## Aschoff Solar Company News

June 2015

### New Project, Royal Cargo, Refrigerated Warehouse in Parañaque City, Philippines

Aschoff Solar finished a new PV project, for *Royal Cargo* in Parañaque City.

The System is designed to generate electricity for self consumption, required for the cooling system in the warehouse.

The System is equipped with some special features due to the regulations on the Philippines and the requirements of the customer:

- Solar Power Management, to reduce solar output in case of demand is lower than solar power
- Solar Power Optimization, to increase self-consumption by managing consume
- Grid and System Protection, to protect the Solar System in case of disturbance in the grid

*Royal Cargo* has over thirty years experience in cargo transportation and handling. Founded as a German/French/Filipino company, *Royal Cargo* is now covering the world with its own network.

#### Project Data

Customer: Royal Cargo Combined Logistics, Inc.  
Location: Paraque City, Philippines  
Solar Power: 245 kWp  
Solar Yield: 300,820 kWh/year
